PROFIL

I am a Frontend Developer with hands-on experience building modern web applications using React and JavaScript. I enjoy working on real projects, solving practical problems, and turning ideas into functional products. I focus on writing clean, maintainable code and building interfaces that are simple, fast, and easy to use.

I have experience working with tools like Vite, Supabase, Tailwind CSS, and modern UI libraries, and I am continuously improving my skills through real-world projects and self-learning.

LOYIHALAR VA TADBIRKORLIK

Fikr – Founder & Lead Developer
Fikr is a modern social platform designed for sharing ideas, opinions, and discussions in an open and intelligent environment. The project focuses on creating a space where users can freely express their thoughts, engage in meaningful conversations, and build a knowledge-driven community. The platform is built with performance, security, and usability as top priorities, offering a smooth real-time experience across both web and mobile.
